

Call Details: Call Closure Time / SLA - Admin Panel

Purpose: Measure how long it takes to close a caller's request.

Reading the panel

- Buckets show counts and percentages for closure times such as 0-10 minutes, 10-30 minutes, 30-60 minutes, 1-3 hours, 3-8 hours, 8-24 hours, and more than 1 day.

Actions to take

- Focus on the largest slow bucket first.
- Create checklists for repeat requests to speed up steps.
- Escalate items that often cross 24 hours.

Tips and good practices

- Share a simple service level target, for example close 80 percent within the same day.
- Track the trend each week after a process change.
